

## Now Open: 'The RapidEye Geodata Kiosk' RapidEye's Online Shop For Satellite Imagery

RapidEye is pleased to announce that as of today, our easy to use online source – The Geodata Kiosk – is now ready for business with imagery of Germany.

The RapidEye Geodata Kiosk is an online shop for satellite imagery with ready-to-use data available immediately after purchase. After a secure credit card payment is made, the data is ready to be picked up immediately via secure download.

### What To Expect From Our German Version

All data available in the Geodata Kiosk are RapidEye Ortho Products (level 3A); orthorectified, five meter pixel sized multi-spectral imagery from the RapidEye satellite constellation, ready to integrate into any GIS system. In addition to the data for Germany this release also includes the data for 16 free demonstration products for potential customers to test.

“The big benefits for our customers are that they can choose and buy only the area they really need, as no minimum sized area is required and purchases can be made with as little as 50 Euro. Customers instantly get what they order and can choose between different delivery formats, including GeoTIFF and NITF. Re-projection on-the-fly between UTM and geographic coordinate systems is also an option that will appeal to our more knowledgeable customers,” comments Michael W. Prechtel, Head of Marketing and Sales for RapidEye.

### So Easy to Use

The Geodata Kiosk interface is very quick and easy to learn. After following 6 simple steps, you will obtain the requested data and be ready to start your project.

### Free Test Data

In the Geodata Kiosk, we offer a selection of sixteen free demonstration products with images from all over the world.

### RapidEye's Geodata Kiosk Alert Service

All updates regarding the progress of the Geodata Kiosk will be available by either following us on Twitter at [www.twitter.com/rapideye\\_kiosk](http://www.twitter.com/rapideye_kiosk), or by sending an email requesting a subscription to our newsletter to [newsletter@rapideye.de](mailto:newsletter@rapideye.de). These updates will not only inform subscribers about the future international version of the Geodata Kiosk, but will include information about new areas that have been or will be added once the future version will be available.

### How to Access the Geodata Kiosk

The Geodata Kiosk can be accessed through the direct URL [www.geodatakiosk.com](http://www.geodatakiosk.com), or by visiting RapidEye's website at [www.rapideye.de](http://www.rapideye.de). On the welcome page, you can find an online help page that explains the entire ordering process, as well as technical and pricing information.

This initial version of the Geodata Kiosk may have minor system difficulties, but will not affect the quality of its data. RapidEye would appreciate if any issues with the system will be reported either through the feedback function in the Geodata Kiosk or via a direct email to [kioskfeedback@rapideye.de](mailto:kioskfeedback@rapideye.de).

### International Roll-Out Coming Soon

We plan to expand the Geodata Kiosk in 2010 to include data products from around the world, with a dedication to providing continually fresh imagery and making data from all over the globe available to anyone, anywhere at anytime.

### Additional Ways to Obtain RapidEye Satellite Imagery

The RapidEye Geodata Kiosk is not the only way to obtain RapidEye satellite imagery, nor is the imagery available on the Kiosk all that's available from RapidEye. For the opportunity to purchase millions more square kilometers of Earth as single or multi-temporal datasets, RapidEye's library can be searched either through a local distributor or directly through our Customer Service department at [sales@rapideye.de](mailto:sales@rapideye.de). To locate a distributor in your area, please visit our website at [www.rapideye.de/distributors](http://www.rapideye.de/distributors).
