On Demand Tasking of RapidEye Standard Image Products

The minimum order size is EUR 5,000 and the minimum Contiguous Area of Interest is 5,000 km². The base price will be EUR 0.95 per km². A tasking fee of EUR 750 per order will apply. Pricing will also depend on the requested date, and the time period allowed for imaging. The desired cloud cover and license type will also influence final pricing. Prices are the same for both processing levels (1B and 3A).

Final pricing for tasking orders will be available on request. Please contact your local distributor (> see [list of distributors](#)) or a RapidEye sales representative at sales@rapideye.de.

Most Up-to-Date Satellite Image Data (Standard Image Products)

RapidEye's constellation of five identical Earth observation satellites allows for an unrivaled **freshness of imagery**. Any point on Earth can be accessed daily, which enables us to respond rapidly to any emergencies or unforeseen events and to fill our **library with large quantities of up-to-date data** (Standard Image Product). Our satellites can collect more than 4,000,000 km² of data per day which makes RapidEye unique in providing **large area coverage** in a **high resolution** of 5m pixel size. The proven technology of our system and the redundancy of our five satellites enable us to offer reliable product availability.

RapidEye's Geodata Kiosk Offers Fast and Easy Access to Our Standard Image Products

Many of our Standard Image Products are available from our online kiosk – with more areas being added on a regular basis. Please visit the Geodata Kiosk at www.geodatakiosk.com.

RapidEye's Library Fills Up Quickly and Offers Customers Access to All Our Standard Image Products

All data acquired each day will be available through the RapidEye library and can be obtained via our distributors (> see [list of distributors](#)), or directly from RapidEye (> please contact sales@rapideye.de). With our high imaging capacity of over 4 million km² our library will not only offer the most up-to-date data, but also all previously acquired data including multi-temporal datasets with unrivaled repeat coverages.

Tasking Requests for Our Satellites Allow Customers to Choose the Time and Area When Imagery Should be Collected

We offer our standard image products “on demand”. Orders of areas of interest imaged during specific time periods can be fulfilled when you need them. Please contact your local distributor (> see [list of distributors](#)) or RapidEye directly (> please contact sales@rapideye.de).

RapidEye Standard Image Products

RapidEye's satellite imagery is available in two different processing levels:

- RapidEye Basic Product (Level 1B)
- RapidEye Ortho Product (Level 3A)

The quality of the processed products will depend on the ground control points (GCPs) and digital elevation models (DEMs) available to RapidEye. RapidEye will consider using customer-furnished GCPs and DEMs for the processing of its data at no extra charge. The prices indicated in this list apply to both processing levels equally.

> For more information please see our [product descriptions](#).

General Terms and Conditions

All taxes, fees, duties and other charges levied by local authorities are the responsibility of the customer unless specifically excluded in the contract.

All transactions are subject to RapidEye's general terms and conditions (> see [GTCs](#)) and RapidEye's End-User License Agreement (> see [EULA](#)).

Contracts entered into with our distributors are the responsibility of our distributors.
